2. (Cont.) turned in and selected photos and art for the paper. I supervised layout and final makeup of the finished paper for offset printing at a commercial printing plant. I was responsible for the full time work of my two assistants, an Editorial Writer, GS-5, and a Clerk-Stenographer, GS-3, and had the part time services of the station artist, the photographer and sixteen correspondents from the Center departments. I assisted department heads and the Command in preparation of printed brochures, manuals and catalogs. I worked with the president of the Civilian Employee's Association in the planning of celebrations and entertainment programs. For instance, for Lei Day last year I got three groups started, a 20-voice chorus, a 7-piece orchestra and a square dance group, plus Hawaiian numbers and produced a forty-five minute show. A repeat performance was given on KGMB-TV. My time was divided about 50-50 between internal and external public relations.

5. (Cont.) they returned. I planned the layout of each of the forty pages, including front and back covers, in regards to relationship of title, sub-title, by-line, copy and pictures. I marked pictures for size, wrote captions for same and sent pix to printer for reproduction and veloxes. I pasted up finished copy and pix (half tone veloxes) and returned to printer for making of offset plates. I woned and used a press and 35mm cameras to take pictures to go with local stories I wrote myself. I handled most of the business affairs of Pacific Patrol, including the hiring and supervision of the clerk-typist, assistant editor and advertising salesman.

6. (Cont.) staff artists and an advertising saleswoman.

7. (Cont.) Magazine in October I also put the magazine on the air for half an hour on Saturday nights with a program of recorded music, interviews with celebrities, humorous commentary and news primarily directed toward Servicemen stationed in the Islands.

9. (Cont.) program, 15. min., once a week over KHON and the Aloha Network - three radio stations on the other islands. I trained committee members in speech to help me voice the news program and to give variety to it. I wrote news releases on our weekly United Nations meetings in the Community Room in the Y.W.C.A. (Average, 8 hrs. per week.)

11. (Cont.) job of circulation manager in the Waikiki-Kapahulu districts in addition to my news reporting. I set up and supervised a carrier distribution system of 43 boys.

15. (Cont.) Okinawa, Saipan and Guam as my duty areas, in that order. My duties were to find and supervise enlisted men to distribute the daily editions of the Stars & Stripes, collect the money and turn it in, and to send in such news ~~new~~ stories from my area as I had time for.

I have been a member of Borderland Science Research Associates, San Diego since 1950. This group has been studying the Flying Saucer phenomenon and its related problems since 1947. I organized the Akualele Research Group here in Honolulu a year ago for the same purpose; and for three years I have been giving illustrated lectures on the subject of Flying Saucers on TV, radio, and to service clubs, church study groups, and to military personnel here in the Islands.

DESCRIPTION OF WORK

My first job at Honeywell was as a hand trucker moving parts from machine shop and metal finishing dept. to stock rooms, and from stock to manufacturing and assembling depts., about 4 months. Then I was made a dispatcher in Punch Press dept. writing route tickets for machined parts to metal finishing and to stock. This required a knowledge of work flow through the plant, ability to read blueprints and to confirm parts identification against work orders, about 3 months. I was then made a production controller in Punch Press, issuing work orders and material cutting orders to 20 press operators. This meant scheduling work to the machines on a production control board.

SUPPLEMENTAL ANSWER SHEET TO FORM 58, Riley Crabb, born 2 April 1912

(Cont.) from work schedules prepared in office. My work required an intimate knowledge of the layout of the shop and the machines, their capacities, and the personalities of the operators. It was also necessary to maintain close working relations with the shop foreman, about 6 months. I was layed off from Aug. 1937 to March, 1939.

I was rehired by the Inspection Div. at Honeywell, checking the finish and performance of furnace controls at the end of an assembly line, using a test stand with heat at set temperatures, about 2 months. I was transferred to the newly formed plastic molding department as an inspector of molded plastic parts for electric controls and heat measuring devices. I went from press to press checking molded parts against blueprints, about 4 months. I was transferred to the Machine Shop to make pressure tests, thread gauge tests and valve seat tests on steam valves, about 1 month. I was then transferred to the stock section of the Machine Shop to maintain the perpetual inventory of raw stock - rod and bar metal, posting withdrawals and replenishment to a Kardex file, about 2 months. I was layed off again from Jan. 1940 to March, 1940 and rehired again in the Machine Shop.

As inspector in the Shop I approved setups on the lathes, drill presses, milling, grinding, hobbing and gear cutting machines, and spot checked production on them, about 6 months. Again I became a production controller, this time in the Machine Shop, scheduling work to the production control board from job orders received from Planning and issuing work orders to the machine operators. Again this work required an intimate knowledge of men and machines, and the need for close working relationships with the foreman and the head of the tool and die shop, about 10 months.

Prior to going to work for Minneapolis-Honeywell in 1936 I worked off and on for my father, William L. Crabb, a building contractor in Minneapolis for many years. This wasn't by choice but by necessity, as I couldn't find other work to my liking. It did give me ~~an~~ intimate knowledge of the building trades, especially carpentry, cement finishing, cement block and brick laying. I did all of it myself, at one time or another, from laboring for Dad when he and I worked alone building a fireplace or a block basement, to supervising his workmen when he was away on another job. None of these projects were larger than a new house or a small store building. I operated power saws, power hoists and cement mixers, and drove trucks, small cranes and tractors. I made estimates of small jobs - time, labor and material, and of course followed them through in the actual building. For the three years from 1933 to 1936 I believe the work could be fairly divided in thirds: a year as a laborer, a year as a craftsman in rough carpentry, cement finishing and brick laying, and a year as planner, estimator and supervisor.
