

~~ADD~~
~~SAUCERS~~

Feb 18, 1957

Si Newton came by this morning, after having spent a couple of days in Los Angeles. He had bumped into Harry Meyers, who invited him over to his house to meet Dick Miller, whom Si had never met. Si kept very quiet and let Miller talk. He was working on some electronic problems in connections with his work, his job, and Si asked him some questions. He opened up and started talking about his experiences with a saucer. He was working at a radio (electronic) shop and suddenly he heard on the 11 wave band (?) a voice coming through talking. He put a directional finder on it and all it pointed was up.- vertically. They by some instruments eliminated all the other short wave stations around, and still the directional finder just pointed up. The message the voice said was that if the hearer would like to see a space ship to go out on such and such a highway out of Ann Arbor, at 3 O'clock, and at one point he should wait. He was there on the suggested time, but nobody else was. He decided it was just a hoax anyway - he really hadn't put much home in it - when he was getting into his little pickup truck to go home. It was about 10 minutes past the appointed time. Then he saw the saucer hovering. It was circular, and the bottom was flat and smooth, and from under the saucer hung a ladder. He went up it and met a man standing at the top. This man was dressed all in white. He talked excellent English. He invited him in. They came into a circular room the edges of which had panels which evidently were partitions off to other rooms. He had no sensation of moving at all, except at one time there was a panel on the

In later years Marcus Loew and H. Clay Miner became interested in the owning and operating of a number of moving picture theatres and they remained fast friends until Loew's demise.

Keep 18° Td25

wall approximately $1\frac{1}{2}'$ by $1\frac{1}{2}'$ which showed a ball, which became larger until it looked the size of a basketball. On it he saw evidences of water and vegetation, and he asked what it was. The answer was "a planet." This was in color. But no further information was volunteered.

The whole time he was there which was 11 hours he had no sensation of hunger or fatigue. There were in all four or five people in the ship that he saw, coming and going, but the one in white was the only one he talked with. The others were dressed in other colors, but he was told that didn't necessarily mean any sign of rating, it just so happened.

This ship was manned by men from different planets, though the spokesman was from a planet outside of our solar system. They work together out of Mars (?), to do research on magnetic faultings. He saw a corridor which had the appearance of being round, and felt that there was a series of circles around the saucer which were the main source of propulsion each circle being capable of a certain amount, like one would have the force to spin them through on the speed of light, the next one twice the speed of light.

(How he got to this conclusion isn't clear. APS) At one time the man asked him if he would like to talk with his friends. He thought that would be nice. So he was tuned in and ~~xxxxxxxxxx~~ talked to them. Then he was asked would he like to see them. He said he would. So the man tuned in a screen, and there he saw his friends sitting around a radio set listening to him talk. He couldn't hear them, but he could see them and figured he would have to say something to them to make them know he did see them. So he told them what they were doing, where they were sitting and what color shirts they had on. Then they told them that if they would like to see him come in they should be at this appointed

In later years Marcus Loew and H. Clay Miner became interested in the owning and operating of a number of moving picture theatres and they remained fast friends until Loew's demise.

was as it no. It passed a lot of time at home before I left. MARCH 12, 1945. I was very nervous about the trip. I had to leave at 6 AM. I got up at 4 AM. I took a shower and ate breakfast. I then packed my bag and left for the bus station. The bus was late, so we waited for about an hour. Finally, the bus arrived and we started our journey. We stopped at several places along the way, including a town called "Makati". We also stopped at a beach and a park. The weather was nice, with clear skies and warm temperatures. We finally arrived at our destination, "Manila", around 1 PM.

place at 2 o'clock, when he was due to land. They were there but didn't have much faith in the whole episode and since the saucer with Miller hadn't yet appeared they got in their car and took off. Miller landed just a few minutes afterward, didn't see his friends, so he went into his truck and started to drive off when they pulled up. They had gone down one road and decided to turn around and go the other one instead.

In LA he has been much with the Meyers. They live a few blocks apart. Mrs. Meyers tells how she herself bought a tape for their tape recorder. They played it once and it was clear, as new tapes are. Then they played it again and there were messages on it. Other tapes, in Miller's voice, have been recorded by his leaning back in a chair and they putting a mike on his chest. No talk. But the messages come out - in Miller's voice.

newspapers for inexperienced talent to participate in a "Professional try-out." (That sounded better than Amateur Night.) He said he would coach all who entered. Any one showing marked talent would be given a job with the show.

At five o'clock on the morning that the ad appea

1954

June 26
Thought on Sat night

Dear Frank.

Your letters at hand and in this dreary
waste spot of the world they are most welcome
Just now, a gentle rain is falling - its a hesitant
sort of rainfall, because 7 to 8 inches a year is
about the limit in this Colo-Plateau land
It may even get scared and take flight off - so
Im not going to say another word -

When I wrote the report on Denver & gave
the bare situation

I have the Phoenix articles - the very same
day in the same paper on front page a big
Doodlebug story - with pictures - A steel
magnets wife & Mrs Smith had been Kidnapped
and held for \$5000 ransom. She was sent in
the Superstition mts, where you did all your
"Last Dodothicus" mine work 30 years ago
Her old man laid the do re mi on the line -
She was released - Days later they caught
a guy wandering about dying from thirst
They have him up as Kidnaper, but he didn't
have the laugh - this doddlebug guy took
some bills wrapped them about his long
rod - Got the Sheriff and a car and away

They went - the money jumped at the bank
as they left town, but they got out in
the desert East of town and where away
to the superstitions that told them - They
got the money pronto - every penny, hidden
where it would have stayed until
doomsday - Adverses never cease, so they say-

I ordered a Transcript of all that was said
in Judges Chambers and in the Court on the
14th Its ready now, waiting for me -

First - we were both found guilty by the jury
Second - we gave notice of appeal -

Third - The Judge then sent us to Probation Dept.

Fourth - according to the law in Colo, so I'm told
we were to come before the Judge to be
sentenced for the crime, the jury said we
had committed -

There was no sentence - It was not even
mentioned -

We were called into Chambers, before Court
met -

The Judge began by questioning Mr. Bauer -
My name was not mentioned. He broached
down the \$25,000 swindle sum himself
as follows -

All over \$2000 Hader spent see wells in
Newhall in his deals with Newhall Oil
Co. did not concern him -

But as to the \$2000, he said -

The states east \$158 or - Mr. Hader ~~said~~
will come out of the \$3000 you are paying -
Mr. Hader paid you \$28,500 that
must be repaid -

Also Hader paid \$1500 for an interest in
the Newhall property - also he paid \$49,400
for interest in Mojave Desert property - The
Judge did not say to whom Hader paid this
money - But the above statements are false (100%)
The whole theory of destitution as to pay back
what you got -

The Judge of course doesn't have the slightest idea
as to what he meant or said -

I am given 4 years 9 months to repay something

I never got - This is far from conspiracy to
commit confidence game - which is a felony
and punishable by a prison sentence -

Lawyers and others sitting in on the matter
(my attys excluded) saw in this act of the judge
a chance for complete vindication on my part.
HettBauer admitted his end - I did not - in
fact I refused the offer of Probation on the grounds
laid down by the Judge -

I later accepted part of the grounds, so that
we could be free to proceed with our present
plan -

See now released from Bond, as of yesterday
For the first time a price has been put on this
deal -

No part of the \$28,500 HettBauer admitted he got
was ever even claimed to have gotten into my
hands - The \$4,9400 was left in the air -

Once we audit the Newtall Oil Co books - the
Hader - N-Oil Co contracts, and the expense money
drawn by me from July 1949 - to Feb 1950 - and
it's shown the Newtall Oil Co at all times had

Moves over and beyond to Hader moneys -
then since money loses its identity once
its in the Company Treasury the Judge on
his own premise will have to set aside
his order - if he refuses then we have action
appeal and otherwise - we think we are now
safe ground at last -

Sue Hader 3 - we are notably via Kardon
Oil Co, now getting papers under way to sue
Hader from Hell to Breakfast, but we are going
to sue the day lights out of Gebauer - in
now free of Gebauers lawyers, and my
trial lawyer Epstein, and have my personal
and conspiracy atty on the job -

I have a lot of papers out there and may
come there next 10 days to get them
in meantime working like hell here - looks
good - mind clear - French Fast - On my
way to better days for us all - Heres check
\$50.00 on the tipping - keep any extra

on our family ac't -

My fine friend, I wrote down during tragic hours all that came of mine - I couldnt stop to break up, edit sentences once its typed, that can and should be done - I already note endless minor errors - but the story is there - Sure I'll take Harris to Washington & that I did so - Anyway its encouraging to have you say you enjoyed it immensely -

As to the copy of my work I believe in the short paragraphs - and short sentences. Im sorry to learn Dabbs is also guilty - I don't think it came out of Yale - Its as tho. I am talking, when I write and thats different in your case - Your trade is writing - You talk a lot different -

To long until tomorrow
Yours
Bi -

OFFICE OF
MANAGING DIRECTOR

THE TENNESSEE QUEEN
MINING COMPANY
URANIUM — VANADIUM

May 31st (1954)

Dear Frank -

I was in Grand J. yesterday morning. There had been a squib in the local paper announcing that Fry would talk - I went over to see the owner of the Sentinel - He and his wife went - Mrs Walker stayed to the bitter end. Walker couldn't take it - He told me he had an hours talk with Fry, the day before the lecture - Said he was impressed with the man - and told him I would surely be present - But I didn't see the paper until 7:30 PM and I was a hundred miles a way - No cancer to ride in, so I didn't make it - The Walkers had seen the movie Welo made and I had briefed them on the whole Cancer business. They, are my very good friends, and are coming out tomorrow, to spend the day and see The Tennessee Queen - from which we shall start loading out ore by the time you read this -

My story of this strike may be the biggest

Willing since they started the Queen build up -
I found this property 4 miles from our
Yellow Cat operations. Studied it with my
instruments for over 30 days - The whole
Uranium formation had turned it down
even the Madame Curie took 40 tons out of
the next shaft at 24 feet depth of 10% f.
that made 5 grains of Uranium
I have the skin she sat in - and have
it photographed for Smithsonian - I photographed
Wm G Lamb, 81 years old, famous mining
engineer whom she visited at Lake Springs
in 1905 at one of his big mines, with
some problems -

I have uncovered one "roll" and it
is now exposed to the blue sky above -
It contains 2000-2500 tons of Ore - with
the bonus we should get over \$100,000 for it
5 feet below it is the next ore body, 11 x
surveys 150 x 70 x 6 - about 93,000 tons -
that is partially uncovered and will all
be ready when we load out the 2000 tons
It is shaped thusly  and the 2000 tons.

B is the 93000 tons - C is old shaft 30 ft
deep - the side next to the outside has 6 ft
of ore - some as high as 2% copper -
the outside a mere trace - ore finished
out. It was dug 50 years ago looking
for copper - D - is the section where side
of hill was opened and side drift of 6 feet
into ore was cut - It had 6 ft wall of
ore, no copper except stains - So when
my depth measurements were verified when
we put ladder in old shaft and climbed
down, I figured my outline survey
measurements to be OK. The assays
verified my checks. See all uncoated
was exactly as I outlined it - If the
B section is as surveyed, will load over
\$2000.000 of ore into trucks in 3 to 5 months -
will that be a story. People are coming to
the operation every day - as I walked down
Moab's main Boom street people stop me
to ask about the strike - I say "Well it looks
fair" we have 600 acres surrounding this
claim - so no one can get close -

So we shall see how the old luck runs! All my life when it starts my way, its a flood - How do you like the name - "The Tennessee Queen"? Figure it out -

I havent told Sharon anything except to say we are making real progress. This is the first report of actual operations to anyone -

England are paper reports of trips talk, and Uranium report same day same paper -

Pass all this on to Gene -

And now for a hot one - The La Sal Mts. 3 big 11,000 ft peaks are young and when they rose they uplifted the whole country and made the Colorado Plateau. 3 or 4 major faults resulted 30 to 5 miles long - Spotted out flanks on fault for 25 miles, and our Tennessee Queen is in this major fault - I began with 3 other men to explore the length of this great fault about 10 days ago, All of a sudden I said Stop the car, there's a magnetic vortex - They had heard the vortex story - They are Geologists and Miners

experts - So I shot this Vortex a mile away - It was an alternating vortex about $\frac{1}{4}$ mile from it was another, It turned out to be a Direct current vortex - We traveled over 15 miles along the fault area - Have found 5 all told - Tomorrow Sunday, the Walkers are coming for the day to see the mine work and the Vortex phenomena - Walked made 3 trips down the San Juan & Colorado Rapids in flat bottom boat so this is an explorer on his record - Have we found something new under the sun in these Vortex's - Are they common to major fault areas? We shall see - I shall dedicate some money out of our operations to this research and let Gene lead the research - He already had done heroic work out there -

Thursday night Muddy Face - a grand old Bulldog - Howards pet, went out to take a leak - Some murderer killed this

friendly kindly old dog. He protected Howard
as his duty - they buried him in his
sleeping blanket, avoid tears, yesterday.
There are still vicious fleas on this old
troubled mud ball -

To endeth this epistle - I hope
to head your way next Friday, but
will advise - Love to all
RJ.

Thompson Mohr
June 17th

Dear Frank,

Just to let you know they
made a new switch on this
Criminal Felony. Farce hasn't been
playing the Denver District court
longer than McCarlley has been
confusing the public.

The Judge called every one into
Chambers, and announced with his
speaking voice that he felt very
strongly that this was a case for
probation and restitution - I've
ordered and paid for a copy of the
entire proceedings in Chambers
and in the court.

There was and is no sentence to
prison - In fact the subject was
not mentioned.

The Judge said the D.A. department

had broken down to \$250,000,
which of course has been a new
paper scare head, and he wanted
to know of G. Bauer if he could
say the states expense about \$3000
He's lawyer said just at once
in a few days - They settled in
10 days - Then he said Hader
paid you \$28,500 can you pay
that back - "will in time" - Then
he said heres 1500- and 49400
Hader paid for interest in property
in Newhall and Mojave Calif. He
didn't say who too - So Gebauer
and his lawyer wrangled about
time - so they left on Oct 1st

At a starting point 15% of his
income 1st year 20% 2d 25%
3d and thereafter - at end of 4 years
9 months gave Hader a note
for balance and to be paid
each year here after equal to
the amt paid last 3 quarters of
last year - All agreed -

You will see all these things
come to me - and myatty
announced I had no money, and
I proposed to carry my case to
supreme court in appeal - The
Judge said well start settling
first - The place was in an

upward with deadly silence
Then I confirmed by request
the statement -

"Next morn my Atty's booksman
and a friend went into a long
huddle - we decided that since
this was a collection agency, hard
as to money paid me - which
here was none - we would
agree to court decision - get a
CPA firm audit the whole
money sub - support audit with
a complete review and show
court by Certified audits that I
never received a penny of any

Kid. Get Bauer admits he got
money - Then we will go before
Court and show Judge fallacy
of his cause, and that Dill's
left hand deceived him. This is
the first break down of money and
the claims by the Judge must pay
him and all is well.

So back ouratty goes - Tills
judge did agree to 15% of income
beginning Oct 1st no income no
pay, and 20 & 25 etc - The
judge came with his books on
announced his ruling -

Lawyers all over Denver were
at buzzin - No body ever heard

of such doings - But there you
are - My fight now is to
get the Judge the certified facts
on the theory he will dismiss
as against me - It saves 1 to 2
more years of court fighting
\$10000 of expense and always the
chance of being stuck - Not the
best, but will vindicate me -
My bond is discharged by
June 25th

More next time
Yours

Sir
Epstein is coming Calif on
vacation - May call you - He asked
for your ad -

Sunday June 27th

Dear Frank -

First here the check that wasnt in yesterdays letter - I wonder if the typist if not already finished caused use second sheets that would give a little better imprint -

I notice she doesn't believe in Capital letters - Where did you get this idea they don't belong -

Whatever you do see the Sauer book is OK by me -

Since you've read the draft of the last section sent you, I'm sure you see I must do a lot of homing and tuning on a lot of the scientific side here -

I have all my tape recordings in L.A. will dig them up when I come out. Had our tape recorder - Sharn went by 2 weeks late - They say they didn't know where it was, \$45⁰⁰ for \$200 machine

Our attys have already commenced work on the suits against Flader and Helbauer. My associates in this Uranium deal are

V

fully aware of all the facts and are backing
me in my programme -

I have to go to Tulsa to get Reblin to
work on the company audit - see Hader
deals July 49 to Feb 1950 -

Then we have to employ C.P.A. Firm in
Denver to examine the entire case, all
the contracts, make audits, make analysis
separately of the contracts, what was done -
and who got the money, my connection
with the Newland Oil Co., my interest in same,
the stockholding record - in fact such a
report will show, which never appeared at
the trial, because the Newland Oil Co. was not
on trial, but the Judge has brought them
into it, because of the money angle -

Gene has some of my books - I'd see about
the Tesla book when I come out. I want to
pick up my bags and baggage you
have so kindly cared for during the
long months -

Gene has sent me complete copy of Frys
book - all this stuff - Fry - Van Dusen -
Bethune. Adamuski is so much science-
fiction crap that its funny - and his
secret sue man contact business leaves
me cold -

I'm here in the best spot on earth
for them to alight and see me - but
two dice - I'm waiting -

There may be appeal - But the programme
is for 100% vindication -

Best of everything

Tuesday June 29th

Dear Frank -

Your mentioned test Bulle gave you
the story in the Phoenix paper -

There's two - one the Ad. story, garbled
as usual - the judge made no such statement
The Post asked me for one and with H. Bauer
Hader and the attys all in ten feet I said
sure &e give you a statement so you can
put your usual \$25,000 Swindler lying
paragraph in it as a lead - You just
saw the Judge knock \$170,000 off your
award for a loss - Write that in your paper
and as far those two lying Thieving Crooks
standing there, (and I pointed to Hader & H. Bauer)
See my book they are a pair of a kind and
what's more their day is coming - My position
is exactly as its always been - I wasn't
a party to this deal - and I haven't
changed one iota! That was that -
The second story is 1st & 2nd page with
pictures - A Coddle bug found the money

DENVER

just like Carr - Paul Beamer Jiminy Brader
and I did when we took off across the
desert to look for the home of that chunk
of gold ore -

If this Uranium comes to pass and it
looks like it will - I'm going to dig that
gold and silver up - far free down at that
old mission east of Riverside on the
way to Palomar - and will let the Press
have test supported by the Fathers at the
mission I'm going to have a lot to say
to the oil fraternity one of these days, about
Doublebog oil finding - You would be
surprised at the actual favorable record
on tent score - It beats the 8 to 1 shots
of the geologists and geophysicists all
hollow -

The next 3 months will be about the
busiest I've ever had - we have all these
lawsuits of the company against Raker

To prepare and file - There'll be two or
three of them, aggregating about \$1 million
dollars -

Then there'll be two important suits against
GetBauer - and we are thinking very
strongly of a Federal prosecution against
him -

Next, there's the audits from our Tulsa
Tax & CPA men, and a CPA firm in
Denver and the preparation of motions
to throw at this Judge arising out
of his findings and rulings - I'm not
using these incompetent legal lights we
have cussed with him and this case -
and by the way what ever happened to
Brigham Rose?

Guard these few papers until your
life. There's meat in them -

Best of every thing.

I want to get that way about you -

It's to 15% I hope it will work out.
