

Dear Frank -

Monday the 19th

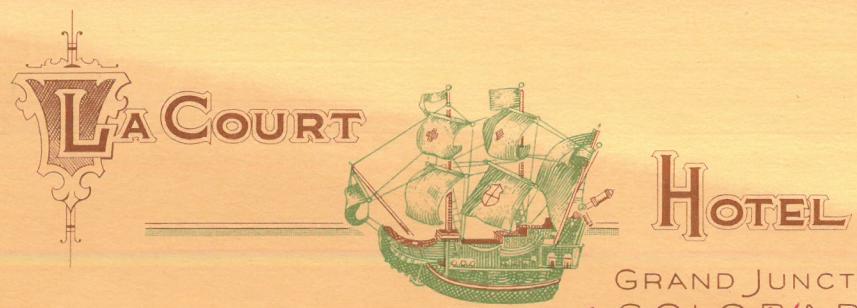

Your letter buoyed me up into the clouds where I regret I can't find a Flying Saucer. You didn't tell me about the Big Rock convention.

I hand you herewith three more segments of my game - As you will note when you get far enough into it, I mention the six stories I wrote - and figure they belong in this work -

Please if and where you made this allotment tell me what it really sounds like -

There's a lot of things I haven't written about and I'm puzzling over them - My idea in this work has been to lay the foundation where by the reader can judge me - Does it appear from the record that I belong in the swindler category - Does it look like I'm running about seeking to scampire to commit confidence game - Does it appear that I seeing an opportunity to gain access to physiological methods that would make oil finding easier - Let what any prudent man would do to look into it - Ted Hader

WESTERN COLORADO'S Finest

Marshall and Jacobson buy 2 1/2 % stake
in an oil lease in California as a sucker
play - or did they believe the work of their own
man - I spent \$40,000 trying to drill a
well on the lease they bought an interest
in - does that crossed or a confidence game - ?
This whole thing requires a literary Sherlock
to solve it - It becomes involved as I tackle
it - I don't think we at all understand it even
now - Their problem now of course is the
legal errors that can reverse the lower court
when they go before the Supreme Court -

I've spoken to all kinds of audiences with
the material on golf you find here - They
loved it - The same is true as to the Romance
of oil - Does it belong in a book?

Yours

Sir

1954

Newsp

Jan 8 1954

Dear Sir:

At the present moment Alice is probably with Sharon, having taken a radio down to her on learning she didn't even have that much company these days.

Your letter which arrived today reminds me of myself and a character in Arnold Bennett's *Riceyman Steps*. He could go through any crisis, a battle with knives even, as calm as a knight in armor. But the next day he began to quake and shake all over.

This delayed take simply means that a shock cannot be ignored. It is either instantaneous or delayed. And in your case as so often in mine it's delayed.

Ever since this blow hit you back in October 1952 I have been operating on reflexes trying to ward off the effects of the shock. You sought escape in experimentation and consorting with guys who sounded even more plausible in their solution of pressing financial problems than even Gebauer did. I tried to write my way out of the bombardment, knowing at the same time that it was better to hide in a slit trench till we could begin counter attacking. But like Korea it is obvious to me that we will never win this one. As I look back now I cannot understand why I didn't press for you to lecture all over the country as soon as bail was set. But you're such a plausible talker that I saw no reason for disbelieving the pitchmen you believed in.

You know by now that I don't know how to make a fast buck. In fact my interest in the subject is practically nil. Anything over a couple of hundred dollars a week are box car figures to me. I hear men discuss them but they are no more real to me than a movie. But I certainly understand that being broke is real, even if being fabulously rich isn't, and I understand too that justice is not one of our vaunted freedoms but must be paid for, and at very impressive figures if you're appealing from lower decisions.

But when Doc says, "I'll fight this decision if it costs me half a million dollars" what is he talking? Nonsense! Of course if he isn't talking nonsense you have no immediate worries because you are like Siamese twins right now and if he works himself off the hook that takes you with him.

More later and I hope in a much more cheerful vein.

Sempre,

Frank Scully

OFFICE OF
MANAGING DIRECTOR

THE TENNESSEE QUEEN
MINING COMPANY
URANIUM VANADIUM

Aug 17/54

Dear Frank - Being late

Your letter by mass production came today
See putting a stamp on it, to send it on its
way. Mass production is my problem here now,
I have shipped 20 truck loads of low grade ore. as
it lay on top of the main ore beds. Today in Pit
2 we catted into what we had surveyed as
the main ore body. Rich beautified Carnotite
heavy in Vanadium turned up. I don't know
if its a tribute to my magnetic instruments
or what, but my two head miners are goggle
eyed. They say, "you hold in your hands the
solution to all mind troubles that have beset
miners from the ages". My answer "Don't be too
sure, this is experimental research, and I learn
something new each day. I have mapped
down in detail 3 main ore bodies, see the
Tennessee Queen, two of which we are un-
covering - the pimple see No 1 Pit, we surveyed
exactly and it is all uncovered and we are
fast away into the body directly below it. So
far our measurements are correct, and if the
entire body 150x70' measures as per survey
I can feel that a victory is won. No 2 Pit.
so far is uncovering exactly as surveyed
we found many small stringers of ore all

of which are exactly as surveyed, so if we have hit the main ledge all is well - There 50,000 tons in it and 90,000 tons in the no 1 pit - In dollars this is over 4 million dollars in ore 11 feet below the vein in the 1st pit is 27 feet of or about 400,000 tons, that's 12 millions in dollars value - we have surveyed at the old Madame Curie pit 230' x 60' and there are 3 ore bodies, one of which has 40 tons was mined from. It graded 10% and better than ore is now worth \$700⁰⁰/a ton. Our survey shows over 100 feet of thickness in the 3 zones. If this is true and the ore only averages 18% not 10%, (and if you were here I could take you down in the old shaft and count 12% ore from the ore body exposed,) there over 100 million dollars of ore in this one roll - You would be very happy for me if you could be here and see the top running mining people who visit the property each day - We don't down on any publicity as I want all my ducks in a row, all my debts paid, before I sit out a cent - and I want all my suits filed against Flaher and Hebbauer - This is all going to take 60 days time, and its work from 5:30 am to 10 at night - This all

brings me to my trip there. I can't emphasize
that all there is to it. I must have things
running smooth - 200 tons a day at big
production - I hope to have it going in another
10 days. and then I can say where take off
for 2 or 3 days there -

"I found a hundred million dollars with
a doodlebug" can easily be my next
lecture subject, - and if it happens, which I
now believe will happen - I because you
first Sir have a sample in hand at the next
mining congress in Denver with the whole
day set over to my research, and I shall
give to the world the first scientific explanation
of Human magnetic research and Sir being
from Egypt, from Cairo, whose book is
a classic, Kenneth Roberts, the literary God
Father of Henry Gross and his Dowsing rod.
Sir have Frank Scully there as star reporter
to the world - Sir put the Denver Part where
it belongs bury it in its own ass hole -
and will endow a research agency to educate
the Dowsing world along real scientific lines
and let the scammers be damned - Well

Frank if you've gone this far, you'll say. He's
now nuts for sure -

But you are nuts because you wrote to
some advisor in Tulsa and send it to me
first, but I ask you to pass my last letter
letter on to Gene, and you don't pay a damn
bit of attention to my request, so says Gene,
as I had a delightful telephone talk last
Saturday from Grand Junction via a friend's
telephone. He, my friend, wanted me to get that
film back to Grand J., but Gene said the
F.B.I. had searched Welles' house "Honey"
says he. I get leary when they begin this
line of talk - Have they searched your place
or mine? here are their prize exhibits -

I hope to be Shippng High grade by the time
you read this - Monday I hope - You fat
2071 Grace see envelope, so here it goes. I
hope you get it. and for Crimning Tulsa
pass this letter on to Gene, as its now 10 AM
and my bed time and I must roll out at
5:30 and to the diggings -

Love to all yours, Pi

Si: Second only to yourself I had the heebie jeebees all last week awaiting word from Denver. Your letter has finally arrived. It contained good news and bad. Apparently Hickey and his hordes didn't want to go up on appeal and be reversed and GeBauer would settle for any ~~one~~ terms rather than fight. As for you it remains where I always felt it was in the beginning - a bum beef and a bum rap.

Jerry Baker sent me a clip from Phoenix which was an AP story and the lead said Hickey had granted probation to two men convicted of doodlebugging swindle, "saying his action was taken in the public interest." Jerry wanted to know what in heaven's name was the public interest and why did the judge now become so concerned about an interest he hadn't shown the slightest concern for earlier?

Do I gather from your letter that subject to a CPA auditing of your part in the deal you are accepting the same conditions as Doc on what amounts to a suspended sentence with restitution? I mean there will be no appeal or vindication?

Of course you know you can sue Flader any time for damages as a civil action never has to face a statue of limitations. Apparently in Colorado judging from your case a criminal action doesn't either.

I read the rest of your reminiscences and if it weren't for a heavy heart Id say I enjoyed them immensely. I'll get the balance typed for you, editing merely your free wheeling choice of capitals and your dashing punctuation. I've been reading Rudy Vallee's script too. He wants me to write it. I want \$5000 and 50 per cent of what it gets. He thinks that's fair and is shopping in New York to get the advance. He won't get it but at least I won't be writing for him on the cuff when our own things lie inert on a pile. Funny thing, he has a flair for long involved sentences too. Is that peculiar to Yale?

By the way where are all your tape recordings? I ask because Im buying a tape recorder through Murphy and can now play what Gene and you have. I talked out at Dr Gregory's at Encino last week and also last week Gene and I went to USC to a lecture on the Moon by the top am-astron in the world a Welchman named Wilkins. It so happens another Britisher named Wilkins has a book out called Flying Saucers on the Moon. I thought it was the same guy, which brought a lot of laughs.

Just talked to Gene and gave him a recap of the trial's finale. He was heartened by it and felt it was quite a come down from the high and mighty position of the Judge, the D. A. et al of a year ago. In substance the whole thing turns out to have been a civil action at best but the record unfortunately doesn't show it. This way Cahn and his libels are still in the clear.

By the way have you the Tesla biog? Im collecting all I can to take to the desert and make a third attempt to write the sequel. I am heartened by the fact that my mail keeps coming on the favorable side. Behind The Flying Saucers still seems way out in front as the best and most plausible of all the strange tales from Elsewhere.

I will have to hawk this one but feel sure we have a fairly large pre sold public. I told Gene that if it were allright with you and him Id break it up , 20 to you, 20 to him and Id pay the agent, leaving me 50 per cent. By the time the book appears that may be peanuts to you and I hope it will be.

And so to work.

Ever,

FRANK SCULLY

By the way in your Confessions Mr Rousseau you tell nothing of your trip to Washington with Frank Harris.

Wednesday Aug.

Dear Frank

No this is not my blood - The vultures have it all, this been sent in the field day and night on a leasing program where we are to drill a test well its about 15 miles from Denver and the area has a lot of merit - If we finish the lease work in the next 3 or 4 weeks will drill then otherwise will be delayed my only chance for a paying is when the rig is moved in, can sell some acreage and then if the hole is a well, my interest can get me off the book and whats more I can then look after my family in decent shape -

The tragic happening whereby Sharon broke her arm as about the fiscal blade - I only know the barest details, as left handed writing is all she can do at the present - I learned from Gene that her arm was broken in the elbow and there was some concern as to the arm being stiff -

Well at last I got the radio to Gene - all I know is that they got it to play local stations with police calls in the back ground and it looks interesting as to its merit for what they want. I don't say if its not a shony, well and good, but I just don't have the courage to believe much these days - I had some still frames made for you of the Mulholland Dancer - am returning the film in a few days to Gene - Have wanted the Gov. Thornton to see it but he missed one appointment and as yet doesn't know what he's to see I exist from day to day with the cold shoulder

everywhere our money -

Have had several sessions with the attorneys
in re- the motions for new trial - some of
the errors are apparently new insofar as
rulings are concerned and the appellate court
boys will have to plow some new ground -
From all sides I get encouragement as to the
appeal ability of the Mellmans - and I'm beginning
to feel like that is where their strength lies -
The arguments come up March 22nd a month away
It's a certainty the present Judge Hickey won't
listen - so then the work must be put on briefs
and all that procedure - So 1954 will be history
before we can get the final history written on this case

I certainly hope you are improved in health
I've missed your cheering messages, but figure
you must be quinching away - I wonder how
the meeting between Air Force & Airline Pilots
came out last Wednesday in La. They were to
join hands because the commercial airline people
see 10 to 15 F.S.'s every night so the Denver
Morning News reported on front page last week
and here tells about report of landing on top
of Palomar - that tops Adomski -

← Regards and love to all
Yours
P.J.

Dear Frank

Sunday M¹

I have before me the 1st two Kahn-Chronicle stories - I'm to receive copies of each day's run - It seems to me that its about time I reach the end of the line =

It just does not seem possible that this sort of libel and slander can continue, but it does - In going over these two stories it does not seem possible that any one except a vicious rat could possibly write so many distorted lies -

I am going to write to Cameron the owner and Publisher and set forth the lies one by one related by Calfee. This way of keeping forever silent about these libels is all wrong and if there's any way to get at this paper I propose to do so -

This case here has not been settled and we have not been convicted or sent to prison and see won't be if there's any Justice and Right in the proper courts of this state -

I think it most important that you secure a complete file on this series - as it has been running all the week - after your letter I called S. Fran. and now have two copies balanced way. You ordered papers from dealer here but none have arrived since Tuesday

The picture came and at first I thought it changed but the film had only been reversed. I have had it since 10 A.M. and have shown it to 3 people

(2) who can help in any programme that may come here - Haue has written me at length and I want to do what I can to help get his picture on its way, but it seems all the time I am the lead dog - Haue, its this radio business - I've watched the scenes change there fast 3 years. I've gone over every act of Doc's minutely with Jacobsen, who first him here in Jan 1949, and who was at your house - we have tabulated carefully all the short comings of the man - being dug into every angle of all that he ever had to say on Tanneur - the strange thing about it all is this - Haue does the "New Magnetic world" (Gueds or Canadian project crowd - and other name scientists) after 3 years of waiting get on board "Magnetic Propulsion" Canada having been there since 1952 - Haue is it these disks as they are photographed (Ric J. Adamski, and this movie) all take see the slope described? Haue is it that person after person witnesses (like the minister at Cheyenne Kans, and dozens of others) describ these as again act shows them? Haue is it that Clerk with security permission gave the Glendale story and confirmed Docs description even to the little men? One thing is certain, Between Haader and Haue my whole life is a shambles and with traits like Cahier to distort things and print lies. I am certainly the prime victim

③ of some vile conspiracy and I can't figure
why - Its common knowledge here that this
Hader has for 40 years been a vicious, unscrupulous
dearvater, He on the record has been in the
courts more than any ten men in the state
all put together =

The fiction that was built up and shown
to by Hader, that I had gone with him
to beginning months before I ever met him
and HeB was along was all a part of the
scheme to set up the con gag. I was in
Calif in mid April May and first of June
in 1949, but Hader had me in April & May
turning to Sutton Creek with him & HeB.

Cahar in his vicious attack now has me
employing HeB as a research engineer for
Kevlon Oil Co - How sent the case - Hader never
once had me in anyway interested in HeB's
equipment - Hader & HeB were in business together
from April 49 to this very hour on the record
that is in the court and I mean nothing recorded
nowhere and I in anyway referred to in
all that record - Hader swore he asked
me to give an opinion - I gave it, and while
Hader tried to add preposterous lies to my
stated opinion, it was easy to see he was lying
out of whole cloth -

We know now HeB is a mental case and was
born the trial due unquestionably to the basal
skull fracture - He was in such a mess

due to his collapse - His incapacity to think
or move about first, his own defense simply
did not go into the record in any way -
It was a pitiful thing, but there it is - His
attys are the usual - thief robber murder
divarce type who practice criminal work
along with the other - They seemed wholly
ignorant of what they were faced with -
They never once showed any viciousness
in cross examination - As near as I can
judge, they kept the record in shape from
the very inception and lawyers tell me
that's their only forte - It had better be -
But regardless of all this, a whole lifetime
of decent living, has been ruined, and
now this Cahn seeks to secure his daily bread
by peddling far from his concocted lying
version of the whole matter -

My whole life due to my athletic career, principally
golf has been an open book - It's not easy to
be a member of exclusive Country clubs - It's not
easy as a business man to fool bankers both
small and big - All over this country from
1912 to this date I've been accepted for member
ship in clubs from Texas to Colorado and from
Coast to coast - I've been winning golf championship
state and sectional since 1918 in all parts of
the U.S. I have been since 1920 almost without
exception ^{annually} a competitor in US Open & US Amateur
Golf championships and thus my name has
been before the public year after year - I have

Never been rejected for membership in any club or organization no matter how exclusive I was a founder ^{member} for example of the famous Burning Tree Club. Where I'm flung, which I helped to form in 1922 and when I was in Washington in Spring 1951. They honored me at dinner at a meeting of Whole Club - In 1947 I took two friends back to N.Y. to play in US Amateur and I took them to half dozen clubs where I was member from 1923 to 1935 and they still talk about the wonderful welcome we received - Do you mean to tell me that I was in the Con racket these 35 years? and standing all the time in the public eye, I have lectured on Oil - on half - and twice on Gasoline, from a hundred platforms in America these 35 odd years and not once has a shr ever been cast at me or my status before my fellow men - I have borrowed from 1000 to a million on my signature from Banks, and business acquaintances have reported on me all these years - Today I havent a dollar I cant borrow a dollar, all because of this filth that's been hurled at me - Sir not the kind that says, why did I ever stick my nose in to this cancer business - Do you think I would have been so stupid as to permit you to put my name in the

⑥ record if I had any fear of my first
I am not that dumb - least you can bat -
Of course I make mistakes - who doesn't -
He Bowers attys. shut the door the other day
and asked me, off the records, will this
GeBowers machine measure depth - and
identify oil & gas and water zones? I
said they would & they will, and he
had one of the trucks here before trial
started and asked it out East of Denver
in the Little Beaver field. Why the hell you
men didn't make him draw you its workings
is a complete mystery to me" - So you see
that this GeB. so messed things up his own
attys were worried - By the way I've just
had a call from Mellman - He has 3 copies
the story was concluded Friday - He says with
this cleared here we can go after the paper & Cahn
for every thing they have -

Well frank this tragic thing goes on and on
she had a terrible time getting money to Sharon
this month and she went off deep end Friday,
but I hope to have her in better mind by Monday
& Tuesday - I certainly appreciate all you & Alice
can do with her - but I think any matron
fanciers should be taboo with her - and I wonder
sometimes where the lead is with me and Bowers
Gene says Edwards an base holler than ever -

over -

As ever Sir

Neuzel really goes to town
in Feb. issue Blue Book

In late Dec. I learned that the industry meeting had been held in first week in Dec but not at Murro's but in No. Hollywood - that pictures had been shown both still and moving and left no doubt as to the genuineness of the subject.

The Muro Incident

On a Friday about the middle of November I heard from a friend of mine, who is a department head of one of the major motion picture studios ~~of~~ a story about an incident at Edwards Air Base that was very fantastic. There was one point that aroused my interest and seemed to be comparable to some degree to another incident fantastic in itself but with evidence to support the story.

Mr. Studio head D. H. had a ~~man~~ Workman in his dept. who related the following. A metallurgist, a close friend of Workman's father had come over to see workman's father and related the following which workman had heard.

The Metallurgist had been called to Edward Airforce base to examine a flying saucer which had landed there, whether by design or accident except stated, after his examination of the object he had been told that the being from the saucer was in custody there that he was human about $3\frac{1}{2}$ ft ~~tall~~ in height, he spoke English, when interrogated about where he came from was reluctant to tell. Finally a celestial map was placed before him and he pointed to the planet Mars. Doctors had examined him and found him similar to earth humans - except he had no heart. When Beam had questioned Wheeler about his

being different from earth people he said "my circulatory system is cellular rather corpuscular - more like the sap of a tree or plant. Beam had not asked if he had a heart but a tree or plant doesn't have a heart as we know one.

I related the story to another friend who in turn told ~~a radio actor~~ a friend of his, who has been interested in this subject for some time. He flew in and out of Edwards occasionally and said I will fly up and see if there is anything there I can get clearance into the field. He called the field the first of the following week but was informed the field was closed to him altho formerlly he'd had no difficulty in getting in. In questioning ~~the~~ further the answer was "Sony Security" - One of the officers stationed at the base was then contacted by Radio actor, who was a personal friend of radio actor and was told Sony I can't tell you what it's all about but field is closed for security.

The following Friday PM. Bill

Another friend on hearing of the situation decided to find out for himself so he drove up to Edwards. He is a former service flyer having friends on the base, ~~had~~ had security clearance. When asking to be admitted at the gate was refused, he was allowed to talk by phone to his friends but they couldn't or wouldn't shed any light on subject, only ~~said~~ said "you probably know as much about this as we do". While talking on the phone flights of planes were passing overhead every

few minutes at low altitude 1,000 to 1500 ft. as
the they were on paths flying legs of a closed case.
On walking back to his car he casually said to a
couple of M.P.s standing nearby - "What going on here
the last you got a flying lesson?" This brought a
rather startled look from both the M.P.s. He also

noticed several cars with "Press" signs outside randomly
parked nearby, with men sitting in them waiting. He
then decided to into the small town and have a
cocktail. The first bar was practically deserted or won
the second and the third. Here he asked the bartender
"Where is everybody?" I don't know there hasn't been
anyone from the field in for a couple days. They
just painting the Service man in uniform has been
sitting in here for couple days. He can't get back
on the Base." Bill went over to the Service man and
started talking to him. "What going on at the base
he asked? "I don't know," was the answer. I had a
few day pass and when I tried to get back onto the
base on Wednesday they told me my leave was
extended and would admit me. I'm all out of money
and have been just sitting around here writing."
"But you certain they indulge representations
official to discuss important problems that are of national
importance. The representatives are screened for security
reasons and report back to only key men within their

-3-

particular field. The meetings are usually held about the 1st of Dec. About the 22nd of Nov. one of the delegates inquired of the proper authority what the subject for discussion was going to be. He was informed that it was "flying Saucers". Rather surprised he then asked "Well is this subject that important?" I should say it was, we have several beings in custody off of them and what to do about it is a serious problem," was the answer. "Where is the meeting to be held" was the next query. "I do know exactly yet but I think at Muroc Dry lake, I will let you know later" was the final answer.

All this transpired within ten days from the first I'd heard of the incident, they came from different sources, unrelated and to the best of my knowledge none of the people knew each other, I had supplied them with the original info and they had ^{in different ways} confirmed something unusual occurring at Muroc, which tended to support the original I'd heard. In subsequent weeks I heard from many different people other little things that backed up the first reports, inasmuch as no one else had heard anything about this before I had told them and when my original informant on trying to get additional info was told that the story was confidential and that the Metallurgist had talked out of them and should not have ~~been~~ told anything about the whole subject.

In late Dec. I learned that the indestry meeting had been held in first week in Dec but not at Murroes but in No. Hollywood - that pictures had been shown both still and moving and left no doubt as to the genuineness of the subject.
